A platform for virtual worlds

AMBER metaverse is a free-to-play blockchain game & a platform for virtual worlds with various game modes and play 2 own economy. Our mission is blockchain mass adoption and creating a seamless transition for web2 users to web3

The entire economy is based on using an AMBER token to buy a game pass, which gives you the opportunity to earn rewards in the form of virtual property. Open a mystery chest and get rare rewards. Exchange the tokens you receive at the Marketplaces. Stake - you can put your tokens in the treasury and receive rewards.

Unite & Create

Problem

Companies store the digital property of users on their servers. This does not give full ownership over assets.

Solution

The solution is to validate the ownership of a digital asset through blockchain transactions and to introduce NFT standards into games where there is an economy associated with the purchase of property.

Problem

Lack of understanding and trust in blockchain among the mass user

Solution

Free To play A game with on-chain transactions and an in-game NFT browser allows the user to easily enter the world of web 3, register their crypto wallet and even get their NFT while playing.

Problem

Reputation of NFT projects: A lot of short-term projects, they quickly gained a large audience but also lost their reputation, which was a problem for the sustainability of the business model.

Solution

Our solution is NFT digital property, which is the core of the business model where NFT validates ownership

NFT Utility

AMBER governance DAO: become a member of the NFT DAO where 1 NFT = 1 vote.

With our NFTs, you enter the private round of our token sale.

Dropping rare NFTs from a mysterious chest NFT you will get a prize in the form of a token stream through the service Roketo: 300N during 1 year - (1 piece), 30N during 6 months - (9 pieces), 5N during a month (155 pieces) to the purse of the NFT owner.

Staking at Paras

Each NFT will bring you more silver in-game.

You can use AR technology and show off your property anywhere, anytime.

With our NFTs you can play in the real world, and win dance Challenges on TikTok.

Access to a private game club on Discord.

Use in games outside of the AMBER.

DAapp

Amber DApp is where players will have their account and be able to mint, change, buy, sell NFT properties and find friends and meet them in-game.

amber.top

Marketplace

A marketplace based on Mintbase technologies will also use their
smart contracts to sell NFT assets.
Also, anyone can become a creator and seller of their own assets
(islands, real estate, weapons, vehicles, appearances)
by verifying their account on the marketplace,
or develop designs for Amber's NFT asset line.
The marketplace will provide an opportunity to highlight the latest
collections.

NFT is traded in AMBER token and some of it is burned in
transactions.
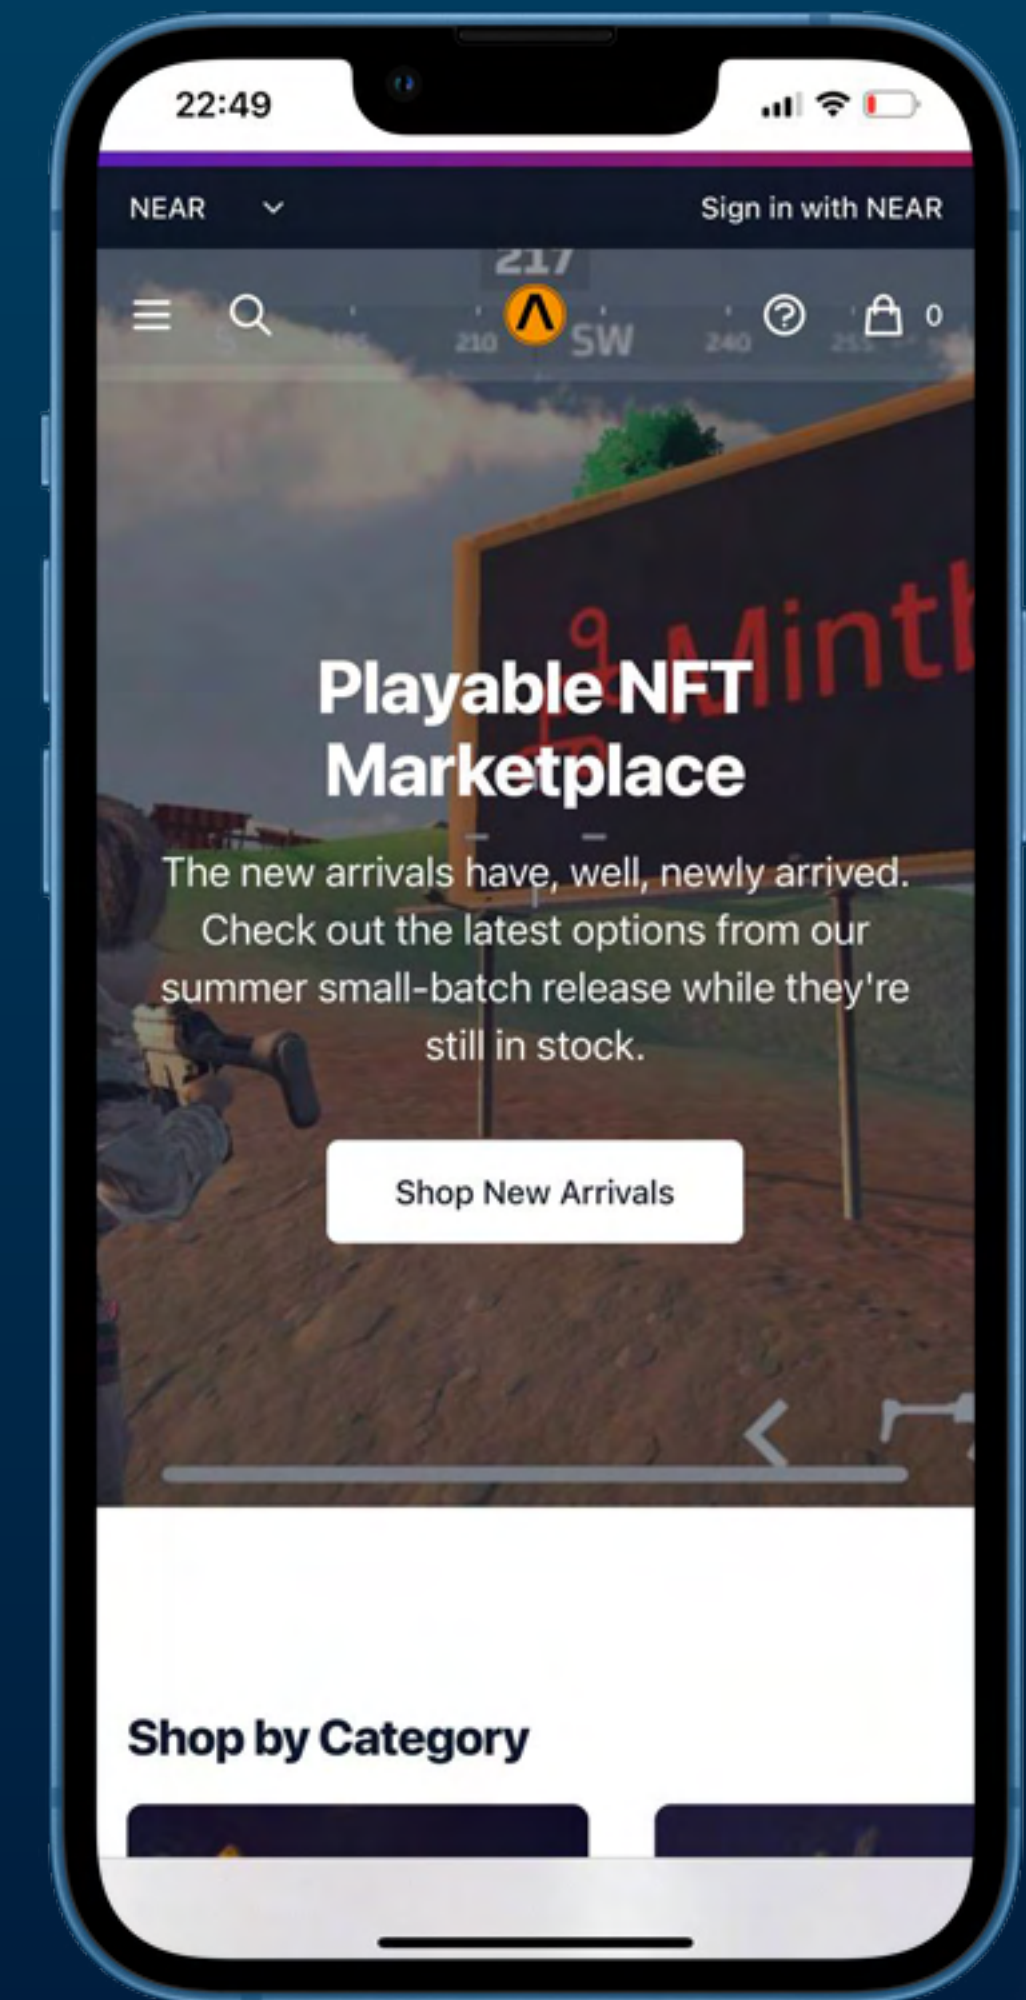

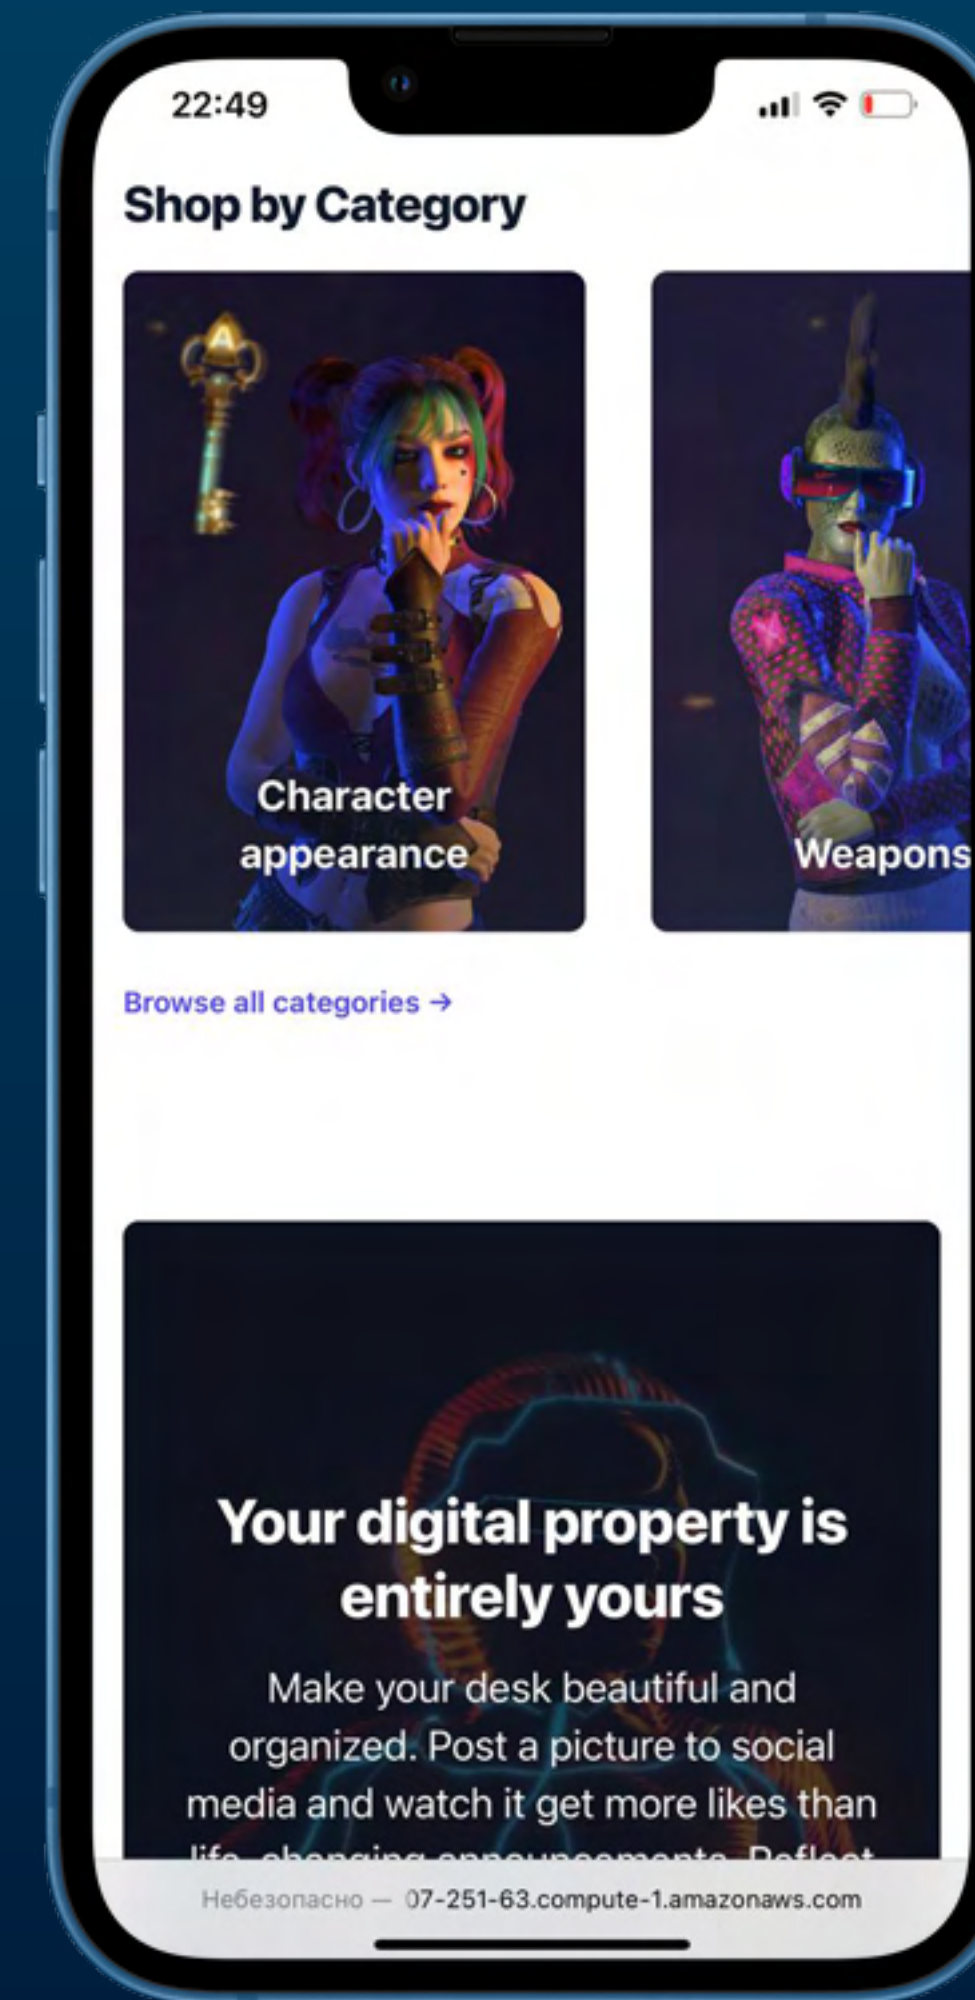

MOBILE Gaming

Our main priority:
- mobile devices
- free2play mechanics
- ability to create your own games

MOBILE GAMING

60%

of total gaming revenues in 2021

VS only 13% in 2012

Game modes

AMBER is a multiplayer game with different types of game modes and AMBER also brings its own modes. Already available modes:

- Death Match
- Kill confirmed
- Defend Territory
- Capture the Flag
- Race Weapon

ambergame.top

Game Pass

This is a kind of subscription during which the user is guaranteed to get small prizes at certain intervals and at the end of which the user is guaranteed to get a bigger prize.

It is traded with an AMBER token, and a portion of it is burned in transactions.

Mystery Chest

Collect a certain amount of silver and you can open a mysterious chest that may randomly draw a rare prize.

Mass Adoption

STEP 1
Web 2

- User Login

- Without Registration

- Play without NFT

- Enter as guest and play without earning silver

STEP 2
Web 2/3

- User Login

- User Registration

- Play without NFT

- Collect experience and silver

- Buy or win series NFT

- Own digital property

- Trade on second market

STEP 3
Web3

- User Login

- User Registration

- Buy valuable NFT

- Resident and member of DAO status

- In-game silver multiplier

- Trade valuable NFTs on second market

Business Model

Key Activities

Developing game modes
Purchasing Nft assets
Resource transaction
Colaborating with products and games
Engaging users and contributors

Value Proposition

Free to play nft game with
various game modes and
NFT digital property ownership

The concept of worlds

In order to understand the concept of the AMBER metaverse , it is necessary to imagine a point which has XYZ coordinate axes. This point is the first NFT world. It is AMBER.

The first three-dimensional body after the point is a tetrahedron - it has 4 vertices, then an okrahedron - 5 vertices, then an icosahedron - 12 vertices, then 42, 162, 642, 2562, 10242, 40962, 163842 vertices. Each verticle is a SMART NFT VORLD.

> Move

Lands, NFT	Price, NEAR	Value, NEAR
1	0	0
4	1	4
5	1	5
12	2	24
42	3	126
162	5	810
642	8	5136
2562	13	33306
10242	21	215082
40962	34	1392708
163842	55	9011310
Total Lands:	NFT	218476

$$\frac{a+b}{a} = \frac{a}{b} = 1{,}618$$

Roadmap milestones

AMBER

1 STEP
- **Android Game.**
- **Google login (wallet attachment)**
- **Legal structure.**
- **Licence.**
- **AMBER Land Smart contract start developing.**

2 STEP
- **Marketplace (start of dev).**
- **New Mechanics, lands.**
- **Token issue**

3 STEP
- **MacOS and Windows game.**
- **NEW NFT DROP (weapons).**
- **Game Pass system.**

4 STEP
- **Marketplace Launch**
- **Own Game Server**
- **Marketing Campaign and mass adoption.**

5 STEP
- **Land smart contract deploy.**
