

SAIA DAO 2022 Flightpath

Vision:

SAIAdao is a Decentralized Autonomous Organization (DAO) created by the Interstellar Alliance community for the purposes of increasing member Status, Utility, & Economic Standing within the Solana blockchain-based space-themed massive multiplayer metaverse game STAR ATLAS.

Goals:

Through a long term vision and a Star Atlas “all in” mentality:

- a. **Status** - Exert influence in the Star Atlas ecosystem
- b. **Utility** - Develop strategic partnerships and provide real utility to members and beyond
- c. **Economic** – Capitalize on the growth of Star Atlas and reward Dao members

Tactics:

Through a decentralized aggregation of community:

- a. Direct voting power (POLIS) in accordance with DAO objectives
- b. Form partnerships to build in the Star Atlas metaverse and provide opportunities to members that could not be achieved at smaller scale on their own
- c. Through the member “Vault” prospering alongside with the Star Atlas economy

Timeline:

2Q22 – transition to SAIA 2.0

- Move to single “exit power” structure until final tokenomics are voted upon - COMPLETE
- Implement clear portfolio valuation and rage quit mechanism

3Q22 – entity formation

- Finalize legal structure
- Finalize tokenomics, whitepaper & high level governance
- Build our brand
- Seek/allow institutional capital (w/ goal to bid on Titan ships)

4Q22 and beyond – blastoff

- Strategic initiatives & growth
- Develop \$SAIA Utility
- Broader daily governance structure
- DAO member contributions / assignments
- DAO meetings (focused on Star Atlas with DAO re-org behind us)

Sneak Peak:

One example of Utility/partnership:

\$SAIA may be one of the predominant marketplace pairs for ticket purchases to utilize the Interstellar Stargate Network (“ISN”). ISN is a space highway being developed by the Interstellar Alliance (“parent dao” of SAIAdao) that may link vast distances of the Star Atlas metaverse and potentially provide a Pandora’s box of opportunities for players and entrepreneurs alike in this brave new world. The assets in the \$SAIA vault will help contribute to building this network. A TBD percentage of all ticket sales denominated in \$SAIA will flow back to the \$SAIA Vault. The ISN has the potential to be used by millions of players as means of fast travel throughout the Star Atlas metaverse. Monetary considerations aside, this network may be a boon in exposing Star Atlas players to SAIAdao and aid in growing our decentralized community.
