

>> "Eirene" is one of the smaller moons of Jupiter. It was named after the greek goddess of peace.

"Eirene is about 4 kilometres in diameter, and orbits Jupiter at an average distance of 23,974,000 km in 743.88 days, at an inclination of 166° to the ecliptic (167° to Jupiter's equator), in a retrograde direction and with an eccentricity of 0.222."

With buying this NFT you will receive the physical item as well, which is displayed in this image. That means that you will get shipped a handpainted reflective coat, which you won't find anywhere else on the market. All my coats are unisex and most of the time oversized. This coat is about Extra Large. I have been creating handpainted pieces for about 8 years now. And they are now owned by various artists, such as AUJIK, Pyur, Orrin, Jpegmafia, Symbios Wiki, Irana Credi, Salem Rashid, Abbi Press, Qualiatik, Quiet Luke, etc

To this you will be credited in my next musicvideo as a supporter and receive my latest LP "What is the opposite of ambivalence" as a digital download. Additionally you will receive two variations of this image in high quality

If you consider selling the alternative (digital only) artwork, which is hidden in the legal document, you can do so only by splitting 40% of the royalties with me.

### Benefits if you bought this from the collector:
