**FOREWORD**

1. (U) National Security Telecommunications and Information Systems Security Instruction (NSTISSI) No. 7001, "NONSTOP Countermeasures," establishes guidelines and procedures that shall be used by departments and agencies to determine the applicable NONSTOP countermeasures for equipment, systems, and facilities that process national security information.

2. (U) Representatives of the National Security Telecommunications and Information Systems Security Committee may obtain additional copies of this instruction from:

Executive Secretariat  
National Security Telecommunications and Information  
Systems Security Committee  
National Security Agency  
Fort George G. Meade, MD 20755-6000

3. (U) This document is not releasable to the Defense Technical Information Center.

**SECTION I - BACKGROUND**

1. (U) Electronic or electromechanical information-processing equipment can produce unintentional data-related or intelligence-bearing emanations, commonly known as TEMPEST. If intercepted and analyzed, these emanations may disclose information transmitted, received, handled, or otherwise processed by the equipment. The procedures to address the countermeasure requirements for traditional TEMPEST vulnerabilities are presented in NSTISSI 7000, TEMPEST Countermeasures for Facilities.
