

Revolution Populi: the leftist view (thoughts from Russian prison)

I first heard about Revolution Populi already being in prison. In prison, where I am till now. Of course, I could not research the subject in detail for reasons beyond my control. But in spite of circumstances I got a certain ideas of political economic meaning of Revolution Populi. In context of dark post-Deleuzian philosophy. I am trying to outline my views now. Let's go.

~~I think what dynamics of interaction between two polar points of present-day global political economic~~

~~I think what dynamics of interaction between Fiat Economy and market of cryptocurrencies can be clearly explained by conceptions, which Iranian Philosopher Reza Negarestani used for description of confrontation (and undercover complicity) between~~

~~I think what interaction~~

I think what confrontation (and undercover complicity) of Fiat Economic Systems with markets of cryptocurrencies can be clearly explained by conceptions, which Iranian Philosopher Reza Negarestani used for description of confrontation (and undercover complicity) of Global Capitalism with Islamic Fundamentalism (Cyclonopedia, Complicity with Anonymous Materials).

I already used imagery of Cyclonopedia for similar task in one of my recent texts. I was considering markets of cryptocurrencies like space of unlimited differentiation of being/existence/objective reality, which subvert any authoritarian economical or political supremacy by disorderly proliferation of measures and scales.

Negarestani's description about mechanics of decay became starting point for me there.

Power request ground in order formative power (power of law, State, Religion, et cetera), but decay incapacitated ground by which power instrumentalize. But how decay or rotting process unground power? Answer lie in differential delirium of decay and cancer attitude toward Scales?

If Scales are made in formative maintenance and persituation integrity, they can also degenerate formations, when rate of proliferation and differentiation surpass capacity and regeneration speed?

Of course, market of cryptocurrencies changed a lot since I was jailed. Five years ago. At that time it really look like chaos, anarchy and "disorderly proliferation" of Scales. For the most part there used to be a market of Deep Web and Shadow Economy. At the present moment the matter is quite otherwise. More people with clear conscience and blue eyes. They don't afraid to show identity cards in case of registration on online-stockmarkets. More regulation. More standing orders.

Rate of differentiation and proliferation levelling by regeneration speed. At first sight.

But I think all that is not so simple. And Fiat Capitalism have no chance to avoid a decay.

Just keep up with current affairs. It can be seen what on both Pole of Fiat Capitalistic Supremacy and Pole of Differentiation appearing patterns of multi-purpose activities. Moreover, these purposes often are exact opposite each others. Such inconsistencies giving vortical movement, which can subvert any straightforward strategy. By situated down screams of undercover complicity between forces of opposing Ontological Sides.

On one hand the Pole of Fiat Capitalism resisting to offensive of cryptoanarchic wilderness. By legislation. And by the Media. To compare news content of american media, which serves interest of Republicans and Democrats. They holds the same views on matters of cryptocurrencies. Despite of difference in views on all others matters. That is noteworthy.

But it is one vector of movement only. On other side of Capitalistic System brewing complete antithesis.

Some Corporations and Institutions understands investment potential of cryptocurrencies. Of course, this investment potential caused on condition that cryptocurrencies can solve problems, ~~like~~ ~~Capitalism~~ Fiat Capitalism makes. I means any restrictions of free economic activities and costs, which caused financial middlemen-institutions and public laws. Nonetheless, some Accors of Fiat Capitalism looks for means for such investment. In order to increase their own influence, in new circumstances.

Just keep up with current affairs. NASDAC already started with bitcoin-futures. It's just beginning.

Capitalism will invest resources in ecosystems, which subvert basis of Capitalistic Supremacy. Fiat currencies. National States. Public laws. It's logic of cyclonic movement.

Any integrated Systems getting in touch with space. Differentiation begins to decay.

To disintegrate to multiplicity of new beings, which have their own interests and strategies of survival.

It's going on here. Inconsistencies inside Capitalistic System increasing.

But complicated patterns of countercurrents exist on ~~the~~ markets of cryptocurrencies too.

Consider Revolution Populi, for example.

It's tactical tasks corresponds to complicated logic of countercurrents, which giving vortical movement.

On the one hand blockchain RVP is made in the capacity of infrastructure for working of future Clearing House. This project is meant integration of cryptocurrency market in the financial system of Global Capitalism.

In this regard blockchain RVP corresponds to needs of some Capitalistic Actors. Which attempts to increase own supremacy by means of investments in cryptoassets. But it's only on the one hand.

On the other hand this blockchain will work as infrastructure for network space of web 3.0 as well. Everybody knows what is it. This phenomenon which will abolish present-day reality of Surveillance Capitalism together with Facebook, Google and Censorial politics of National States.

To sum up.

Blockchain RVP appears like stand-alone machine which can incapacitate (unground) integrity of present-day Capitalistic System.

Like subversive machine which can use resources of ones Capitalistic institutions for incapacitating machinery of others.

Like machine producing decay of Power (Authority) using it's offensive activities.

What do you want? Revolution? Resistance against Capitalistic System?

But in this world leftist Social Justice Warriors forms the Guard of Surveillance Capitalism.

And vice versa. Such projects like ~~Revolution Populi~~ becomes a tool of guerrilla warfare against Any Formative Power. Against Capitalism. Against National States.

Despite of background of Revolution Populi Team.

Despite of relations with Goldman Sachs and Donald Trump.

Such is dialectics of Human History.

And its non-human irony.
